# About us

## ■ Establish

GEORGIA establish in 1999. We have been focus on building materials field along with the urban development of Shenzhen.

## ■ Value

We achieve our team self value from 5 main ways: communicate quality has decided project quality from start. The information of correctly and effective are basic of guarantee for each client.

## ■ Team

GEORGIA team embrace designers, architects and house owners from all over the world with professional and positive attitude. Working together, creating together.

## ■ Strength

A large share of the cost of building a home is determined during the design phase, long before the ground is even broken. GEORGIA's core strength is to provide competitive products with the right architectural style under a fixed cost framework.

## ■ Service

The cost of time is often the easiest factor to ignore. We are in time management will be accurate to each steps of the whole trade. Therefore achieve on time delivery. Long time focus in the building materials industry let GEORGIA accumulate enough experience. We used experience to improve our quality control process. Trial assembly are necessary steps after production. The process will shown to client for check by pics and videos.

## ■ Transportation

The transportation is most of important step in global trade. GEORGIA not only can provide shipping service for client, but also provide storage if necessary. This would be greatly facilitates client coordination of goods in China, reduced shipping cost. Meanwhile, lower the multiple risks borne by separate shipments as well.

# Advice dimension

## ① Advice dimension

Wall opening size:

- a** Width   **b** Height   **c** Wall Thickness

## ② Choose style

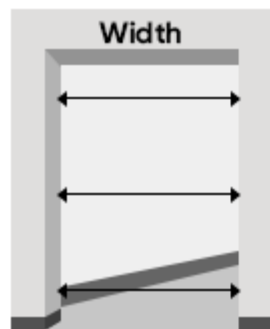

Choose your favorite style,  
provide pictures or the number.

## ③ Choose parts

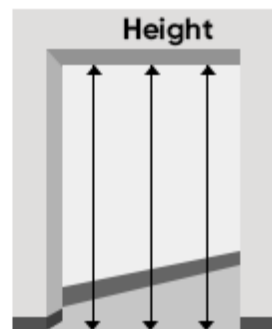

Choose your favorite glass,  
hardware and color  
provide pictures or the name.

## How to measure the wall opening size?

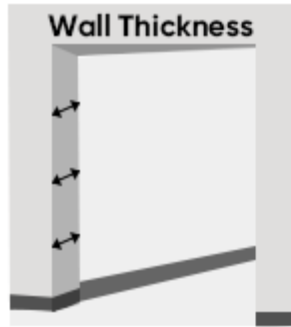

This is important for how wider door frame we made.

First: wall to wall width

Second : wall to wall height

Third : wall thickness  
inside to outside

Reference size:

Double swing door:  
1800-2200mm W / 2100-2400mm H

Single swing door:  
800-1100mm W / 2100-2400mm H

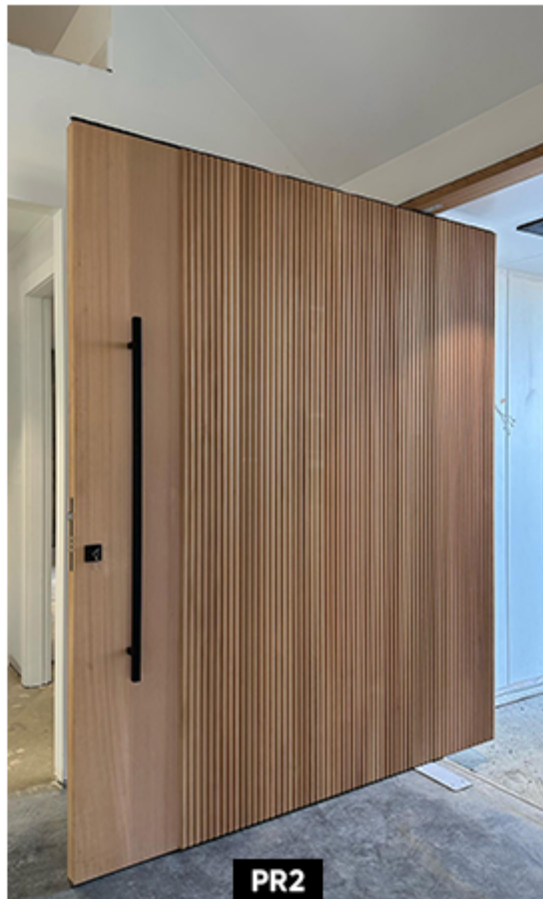

Pivot door:  
1000-1500mm W / 2100-2400mm H

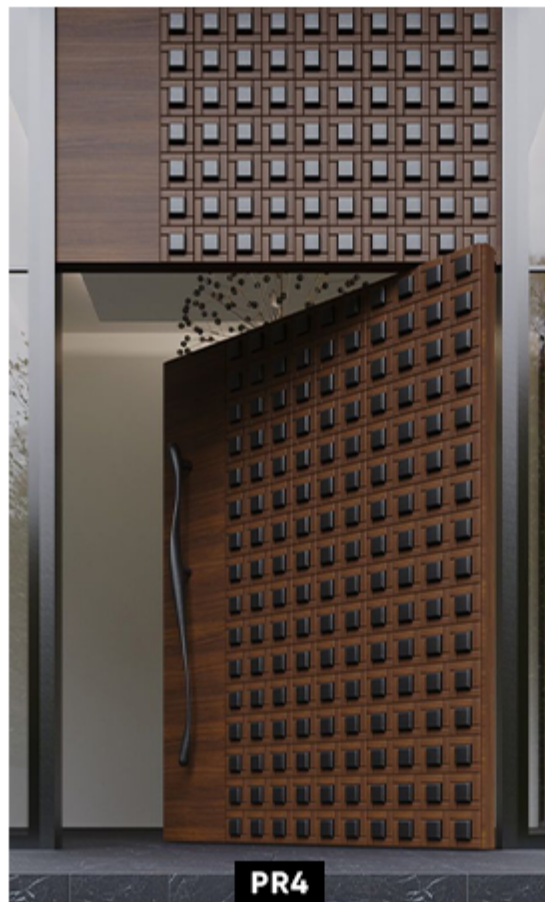

# FRONT ENTRY DOOR

We can customize solid wood doors according to your needs. We combine international trends with local style and timbers.

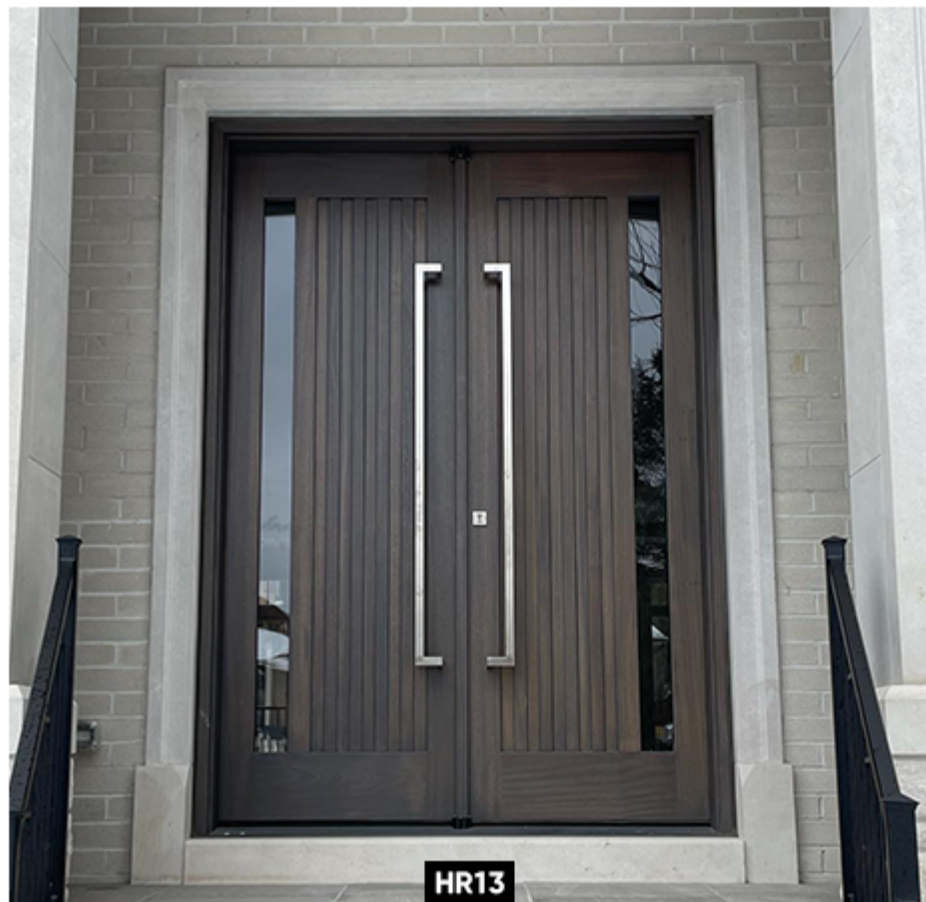

## Hinged Door

Wenge

Black Cherry

Black Walnut

Teak

Sapele

Mahogany

# Sawn Wood Option

## Plainsawn

Wood that is cut parallel to growth rings so that the growth rings are cut from  $0^{\circ}$  to  $45^{\circ}$  to the wide face of the board (a tangential cut) is called plainsawn in hardwoods, and flatsawn in softwoods. Plain sawn flooring is more dimensionally stable in thickness (radially) and less stable in width (tangentially).

## Riftsawn

Wood that is cut neither parallel nor perpendicular to the growth rings so that the growth rings make angles of  $30^{\circ}$  to  $60^{\circ}$  to the face of the board is known as riftsawn in hardwoods or bastard-sawn in softwoods.

## Quatersawn

Wood that is cut perpendicular to growth rings so that the growth rings are cut from  $45^{\circ}$  to  $90^{\circ}$  to the wide face of the board (a radial cut) is called quatersawn in hardwoods, and vertical-grain in softwoods. Quatersawn lumber is more dimensionally stable in width (radially) and less stable in thickness (tangentially).

## Livesawn

Wood that is cut from the outside diameter through the heartwood incorporating the full range of the above characteristics on the face of the board is known as live-sawn material. This cut of wood is typically wider and incorporates all of the above dimensional stability and aesthetic characteristics.
